

Alliance Secure TCP for IBM i

Data Sheet

IBM i TCP Sockets Communications

Alliance Secure TCP for IBM i provides a reliable, automated and secure IBM i client/ server communications interface for connecting PCs, workstations, and other hosts to an IBM i via intranet and Internet TCP/IP networks. It is ideal for connecting .NET, VBNET, Java, Access, C/C++, UNIX, Web, and other applications to the IBM i using standard TCP/ IP communications. IBM i programmers can easily integrate Alliance Secure TCP with their applications to make IBM i data available to remote applications. Alliance Secure TCP includes support for the Secure Sockets Layer (SSL) protocol for authenticated and encrypted sessions. Alliance Secure TCP provides all of the IBM i communications services, data translation, and communications management services required for the application.

About Townsend Security

Townsend Security provides data encryption & tokenization, key management, secure communications, and compliance logging solutions to Enterprise customers on a variety of server platforms including IBM i, IBM z, Windows, Linux, and UNIX. The company can be reached on the web at www.townsendsecurity.com, or (800) 357-1019.

Rapid Integration of Networked Applications

Easy Development IBM i Applications

Automated Communications Management and Recovery

Reduced Cost of Delivery

Error Free Transfer

Features

- Full integration with Internet and local intranet networks
- Easy integration with remote PC, workstation, and UNIX applications
- IBM i data queue interface for rapid development
- Supports both TCP and UDP sockets
- Uses standard TCP/IP communications on the client
- SSL/TLS support for secure connections
- Multi-tasking communications for high performance and reliability
- Full communications configuration and management functions
- Detailed application logs Integrated trace facility Communications error recovery

Hardware Requirements

- IBM i, any hardware model
- IBM i standard LAN connection

Software Requirements

- OS/400 V5R2 or later

Support

- Software maintenance
- Technical support
- 24/7/365 support available
- On-site installation available
- Contract services available
